FIRE RESISTANT Welding Screens

Enhance safety and efficiency in your facility's welding and grinding environments with Fire Resistant Dividers. These all-aluminum divider panels are certified 100% non-combustible materials that produce zero sustained flaming, reducing the potential for flash burns, and creating a shield to protect from the glare of dangerous UV light. And its versatility can be used beyond a welding setting — autobody shops, warehouse and distribution centers, vocational and technical schools, kitchens, carpentry areas, and more.

This mobile welding shield is freestanding, with no overhead rails or frames required. Offering the highest level of fire resistance, these partitions will let you adhere to OSHA standards for fire prevention, arc welding, and combustible walls and create a safe and protected environment for vocational tasks for yourself and your coworkers.

Safety is a Priority

- All-aluminum divider panels are certified 100% non-combustible materials
- Meets OSHA standards for combustible walls, fire prevention, and protection from welding rays
- Product ships fully assembled
- Panels connected by patented 360-degree rotating hinges; set up straight or with turns between panels
- Screenflex fire-resistant screens are more economical and easier to use than similar products
- All products drop ship directly to the customer in 5 to 10 days

SOLID CONSTRUCTION

Steel panel frames and low and durable end frames provide stability to the welding screen. The sturdy end frame enables you to quickly reposition the divider into a straight, angled, "L," or "U" shape to surround a welding area, create a temporary welding booth, or form a complete welding enclosure. The open space at the bottom of the welding screen provides for air flow and offers ample room for welding hoses and power cords.

WALLMOUNT DIVIDERS

Need to divide an area at the same point repeatedly? A Screenflex wall mounted room divider is the answer! A bracket is secured to the wall which allows one end of the divider to attach to the wall. The divider can pivot open and expand into your room to make various configurations to divide your space. This wall mounted retractable room divider is perfect for partitioning a room from the same place every time.

Features

- Sound-absorbing honeycomb core
- Steel framing
- Full-length hinges for privacy
- Self-leveling casters add durability
- Dividers with no end frame fold flat against the wall for easy storage
- Stores in 8.5 sq. ft
